

**American Institute of Chemical Engineers (AIChE)**  
**Wilmington Local Section Event**  
**"Role of the AIChE in Addressing Energy and Sustainability  
Issues while Serving Members"**

**June C. Wispelwey,**  
Executive Director, AIChE,  
3 Park Ave, 19<sup>th</sup> Floor, New York, NY

**Date : 24 September 2009 (Thursday)**

**Abstract:**

Against the backdrop of growing global demand for energy and new energy legislation, AIChE and its members launched a series of initiatives that apply chemical engineering expertise to help develop solutions to energy problems and to address sustainability issues. In this presentation, the role of professional societies and individual engineers in addressing these challenges will be reviewed. In addition, AIChE has launched other initiatives to serve members in their thirst for knowledge and tools to help in their careers. These new initiatives will be reviewed, along with those that are in the pipeline. This is your chance to hear about how AIChE is changing to meet the needs of members and society.

---

**Biography:** June Wispelwey is a chemical engineer and business leader, with vast work experience in the chemical and bio-pharmaceutical fields, who is now serving as the executive director of AIChE. She previously served as the executive director of the Society for Biological Engineering (SBE), a technical community within AIChE, where she oversaw the successful launch and growth of the society. Wispelwey also previously served as vice president of marketing services at the therapeutic proteins manufacturer Aventis Behring and as director of performance chemicals business development and research at Lyondell. She has been worked in process engineering, strategic planning, marketing, R&D, business development and business management. This experience provided her with an entrepreneurial approach to AIChE initiatives in new technologies and energy. Wispelwey earned a bachelor of science in chemical engineering from Princeton and a master of science in chemical engineering from the University of Pennsylvania. Additionally, she also completed Aventis' Executive Education Program at the Wharton School of Business.
